Food & basic needs 6%
Education in emergencies 14%
Cash assistance 25%
Health 15%
Protection 17%

PRESENTING THIS MONTH:
IHL VIOLATIONS IN UKRAINE

Over the past two years, countless **violations** of **International Humanitarian Law** (IHL) in **Ukraine** have been observed in the wake of Russia's war against the country. The EU has put the **respect of IHL** in Ukraine at the **top of its agenda**.

There is mounting evidence that Russia is **violating IHL**, for example:
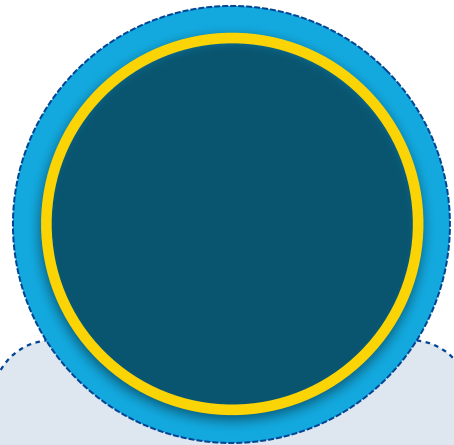

- targeting **civilian infrastructure**, including schools, hospitals and residential areas
- widespread and systemic **torture of prisoners of wars**
- targeting clearly marked **humanitarian warehouses** and **humanitarian workers**.

Through its **humanitarian funding**, the EU is:

- protecting civilians from Russia's attacks by building **shelters**
- providing **protective equipment** to humanitarian workers
- helping clear Ukrainian soil of deadly landmines via large-scale **demining** training and activities.

Since the beginning of Russia's full-scale invasion of Ukraine, the EU has been **advocating for:**

- **full compliance** with International Humanitarian Law
- unhindered and secure **humanitarian access**, including to territories of Ukraine occupied by Russia.

The World Health Organisation has documented more than **1 768 attacks** on **health**, including on **ambulances**, **hospitals**, and **healthcare providers**.

Nearly **2 000 children have been killed or injured** according to UNICEF.
